Dallas, TX 76010 | vemuyash@gmail.com | 2147090938 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with experience building web applications using **Java, TypeScript, React, and REST APIs**. Comfortable working on both frontend and backend systems, developing user-friendly interfaces and reliable backend services. Strong foundation in **data structures, algorithms, and distributed systems**, with experience using **AWS and cloud technologies**. Enjoy working in **Agile teams**, collaborating with others, and building stable, scalable applications.

PROFESSIONAL EXPERIENCE

Software Engineer — ServiceNow

Hyderabad, India | Jul 2022 – Jul 2024

- Designed and developed **ServiceNow platform features and backend integrations** using JavaScript and REST APIs, improving upgrade workflow reliability for enterprise platform releases.
- Built components for the **ServiceNow Upgrade Console**, enabling reliable platform upgrades and improving workflow efficiency for enterprise customers.
- Developed dynamic UI components using **ServiceNow UI Builder, JavaScript, and React**, integrating them with upgrade playbooks to streamline management processes.
- Developed client-side and server-side scripts integrating frontend with backend services via **REST APIs**, enabling seamless data flow across UI and system workflows.
- Implemented automated **frontend and backend test cases**, reducing regression issues and improving stability during platform upgrade releases.
- Built an **Advanced Search interface using React and JavaScript** for the Application Manager module, improving search performance and component discoverability.
- Wrote **modular, reusable components** aligned with enterprise engineering standards; collaborated in Agile/Scrum sprint planning and code reviews.

EDUCATION

University of Texas at Arlington — Master of Science (Computer Science)

Arlington, TX | Aug 2024 – May 2026

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, OOP, Software Engineering, Machine Learning

SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, C#, C	Databases: MySQL, MongoDB, DynamoDB
Frameworks & Libraries: React.js, Spring Boot, Node.js, Express.js	Software Engineering: Data Structures & Algorithms, REST APIs, Microservices, Agile
Cloud Platforms: AWS (EC2, S3, DynamoDB), Azure	Tools: Git, Visual Studio, Eclipse, Jupyter Notebook

PROJECTS

AthletaAI – Distributed E-commerce Platform

UTA | Fall 2025

Technologies: Java, Spring Boot, React, AWS SQS, DynamoDB, Docker

- Designed a distributed e-commerce platform using **Java Spring Boot microservices and React**, supporting product browsing, authentication, and scalable order processing.
- Implemented **event-driven order workflows with AWS SQS**, enabling async communication between order, payment, and inventory services under high transaction loads.
- Built **RESTful APIs integrated with DynamoDB** for scalable storage and containerized backend services with **Docker** for consistent deployment and scalability.

Real-Time Collaborative Document Editor

Technologies: React, TypeScript, Node.js, WebSockets

- Developed a real-time collaborative editing platform using **React, TypeScript, and WebSockets**, enabling multiple users to edit documents simultaneously with live updates.
- Implemented **real-time synchronization via WebSocket communication**, ensuring low-latency updates and consistent document state across all connected users.
- Designed **Node.js backend APIs** for document storage and session management, supporting scalable real-time collaboration workflows.

Visual Question Answering System using Deep Learning

UTA | Spring 2025
